Generations of Infection Prevention

INTERNATIONAL INFECTION PREVENTION WEEK 2026

Past. Present. Protected.

Infection Prevention Technology Scavenger Hunt

interactive in-facility activity

Infection Prevention Technology Scavenger Hunt

Can you find these infection prevention technologies or tools in your facility? Write where you found them or who uses them. Some items may not exist in every hospital, and that's okay!

# | Technology / Tool	Found?	Where Did You Find It?
1. Alcohol-based hand sanitizer dispenser		
2. Electronic hand hygiene monitoring system		
3. Isolation precaution sign generated from the EMR		
4. UV-C room disinfection device		
5. Hydrogen peroxide vapor (VHP) system		
6. ATP cleanliness testing device		
7. Electronic infection surveillance dashboard		
8. Barcode medication administration scanner		
9. Automated handwashing sink or touch-free sink		
10. Touch-free soap dispenser		
11. Touch-free paper towel dispenser		
12. Negative pressure room monitor		

Infection Prevention Technology Scavenger Hunt

# | Technology / Tool	Found?	Where Did You Find It?
13. HEPA filtration unit		
14. Whole genome sequencing reference (lab or education)		
15. Sterilizer monitoring printout or digital record		
16. Biological indicator for sterilization		
17. Autoclave		
18. Automated endoscope reprocessor		
19. RFID or barcode equipment tracking		
20. Smart infusion pump		
21. Temperature monitoring system for refrigerators/freezers		
22. Electronic environmental cleaning checklist		
23. PPE donning/doffing poster with QR code		
24. Telehealth workstation		
25. Ask an Infection Preventionist: What technology has improved patient safety the most?		

Reflection

Which technology surprised you the most? _____

Which technology would you like to learn more about? _____
